

Niyati Trivedi

Lead Product & Experience Designer · London

niyatitrivedi2289@gmail.com · +44 7876 120063 · Portfolio · LinkedIn

Profile

Product and experience designer with 15+ years across UX, interaction, visual design and design systems, including six years leading design for Worldpay's developer and payments platforms through the FIS merger. I lead from research to delivery: running discovery with users, shaping information architecture and end-to-end journeys, and aligning product, engineering and business stakeholders around a clear design direction. Experienced in regulated, high-stakes domains — payments, banking and healthcare — and in client-facing consulting as a sole onsite designer. Accessibility-first, with hands-on build skills from an HTML development background.

Strengths

UX strategy & end-to-end journeys
Multi-product platforms, information architecture, taxonomy, onboarding flows

User-centred research
Focus groups, moderated usability testing, heuristic evaluation, competitor analysis

Stakeholder & client leadership
Workshop facilitation, aligning multiple teams, onsite client consulting

Design systems & accessibility
Components, tokens, WCAG 2.1 AA standards adopted across 5+ product teams

Leading & developing designers
Led a cross-functional design team; mentored junior designers; ran UX training

Agile delivery & making
Lean UX, Double Diamond; Figma, coded HTML/CSS prototypes, Miro, Jira

Experience

Career break — family and caregiving

May 2024 – Present

United Kingdom

Full-time caregiving after a design team restructuring at Worldpay. Kept current with design practice and rebuilt my portfolio as hand-coded case studies and interactive prototypes. Now available for senior and lead design roles.

Product Designer — Lead Designer, Developer Experience

May 2018 – May 2024

Worldpay UK (FIS Global) · London · including maternity leave, 2020 and 2023

Developer Experience — Worldpay and FIS developer portals (2019 – 2023)

- Led design of a single developer platform merging Worldpay's separate Merchant and Partner portals, then the post-merger FIS Developer Hub bringing Worldpay, Vantiv and FIS APIs together, and later FIS's CodeConnect banking API portal.
- Ran discovery with 18 developers across three focus groups, alongside support-ticket and analytics review and a five-competitor benchmark; used the findings to set the design direction.
- Aligned six stakeholder teams across design, engineering, product and DevRel on a single use-case taxonomy, content ownership and naming after the FIS acquisition.
- Led three rounds of moderated usability testing; the System Usability Scale score rose from 52 to 74, above the industry average of 68.
- Designed Solution Finder, persona-based landing pages, filtered search and a payments glossary. Solution Finder and the glossary are still live on docs.worldpay.com.
- Portal nominated in three categories at the DevPortal Awards 2022, including Best Findability and Best Visual Design.
- Built a token-based light and dark theme that fixed brand colours failing WCAG AA contrast and improved focus states.

Design system and payment products

- Led the design system for Worldpay's new brand — components, tokens and accessibility standards used across 5+ product teams.
- Led UX and UI across payment products including Your Marketplace, Worldpay POS and Worldpay Dashboard, creating consistent experiences across platforms.
- Designed proofs of concept for Tesco, Disney, Open Banking and PSD2 with product managers, engineers and stakeholders in Agile teams.

Lead UI Designer

Jan 2016 — Jan 2017

Mobiliya Technologies · Pune, India

- Led a cross-functional design team delivering end-to-end product design for AR/VR, OT and mobility applications in healthcare, manufacturing and telecom.
- Designed an AR field-service assistant for Ericsson — a web CMS and Android app guiding telecom technicians in poor light and with no signal.
- Introduced structured design documentation and component consistency, speeding up development handover.
- KUDOS Award 2017 for design excellence and innovation.

UI/UX Consultant

Mar 2014 — Jan 2016

Capgemini India · Pune, India

- Sole onsite UX designer for the National Bank of Abu Dhabi's retail internet banking (Backbase) across desktop, tablet and mobile — owning requirements gathering, client design approval and handover to offshore delivery.
- Delivered UX and visual design for banking and financial services clients.
- Ran UX workshops and training to grow design thinking across the organisation.
- Developed the winning M-Wallet case study for a MasterCard conference proposal; Tech-Fiesta 2015 winner for a mobile app concept.

Web Designer (HTML Developer to UI/UX Designer)

Jun 2007 — Jan 2014

IndiaNIC Infotech · Ahmedabad, India

- Progressed from HTML developer to web, UI and UX designer over seven years.
- Designed 30+ Yahoo e-commerce stores and built CSS themes later adopted globally by Yahoo — selected among the top 9 international teams.
- Designed for gaming, retail, healthcare and enterprise products; mentored junior designers.
